EDUCATION

2024 - 2028
CGC UNIVERSITY, MOHALI
B.Tech - AI & ML (4th Sem)

2024
GOVT. MODEL SR. SEC. SCHOOL,
CHANDIGARH
12th - Science (PCM), 71%

2022
AAR JAIN MODEL SEN. SEC. SCHOOL
10th - CBSE, 82%

TECHNICAL SKILLS

Languages

Python, Java, C, C++

AI / ML

Machine Learning, Deep Learning, OpenCV,
TensorFlow/Keras, YOLO

Database

MySQL

Web

HTML, CSS

Tools

GitHub, VS Code, MS Office

Core CS

DSA, DBMS, Computer Networks

ADDITIONAL

- Languages: Hindi, English
- Problem solving
- Time management
- Interest: AI/ML research
- Active GitHub contributor
- Real-world project builder

PROFILE

Detail-oriented AI/ML student and developer with a focus on end-to-end project execution. Proficient in Python and Java, with hands-on experience building scalable web applications. Adept at transforming complex datasets and algorithmic models into functional, visually engaging digital experiences. Driven by a philosophy that powerful technology is most effective when paired with superior UI design.

ACADEMIC DEVELOPMENT

AI, Machine Learning & Software Development Learner

2024 - PRESENT

Self-Directed Academic & Project-Based Learning

- Building practical projects using Python, MySQL, OpenCV, TensorFlow/Keras, and web technologies.
- Strengthening core CS fundamentals including data structures, DBMS, computer networks, and software design.
- Applying AI/ML concepts to real-world use cases such as attendance automation, safety monitoring, and decision-support systems.
- Improving project presentation with clean interfaces, organized documentation, and user-focused workflows.
- Practicing end-to-end development from problem analysis to implementation, testing, and final delivery.

PROJECTS

Online Food Ordering Management System

ACADEMIC PROJECT

Python - MySQL - HTML/CSS

- Built a complete web-based food ordering platform with menu browsing, cart flow, and customer order tracking.
- Designed a database-backed system to store customer records, menu items, order details, and transaction history.
- Reduced manual order handling by organizing restaurant operations into a structured digital workflow.
- Implemented clear user flows for selecting food items, placing orders, and maintaining order status records.

Smart Attendance System - AI Face Recognition

AI/ML PROJECT

Python - OpenCV - TensorFlow/Keras - MySQL

- Developed a real-time face recognition pipeline to automate attendance marking from live camera input.
- Matched captured faces with registered student records to improve identification accuracy and reduce proxy attendance.
- Stored attendance logs in MySQL for reporting, verification, and simplified record management.
- Applied OpenCV and ML concepts to handle face detection, feature extraction, and recognition workflow.

Smart Weapon Detection System

DEEP LEARNING PROJECT

Python - TensorFlow - OpenCV - YOLO

- Trained and tested a YOLO-based object detection model to identify weapons in real-time video feeds.
- Built an alert-oriented monitoring workflow for quick response in safety and surveillance scenarios.
- Applied frame processing, model inference, and computer vision techniques for live detection pipelines.
- Focused on practical AI use cases where automated visual monitoring can support public safety.

CORE STRENGTHS & CAREER FOCUS

- Interested in AI/ML, computer vision, full-stack development, and intelligent business process automation.
- Comfortable converting academic concepts into working applications with clean logic and presentable interfaces.
- Focused on building reliable, user-friendly software that improves efficiency and solves practical problems.

RELEVANT COURSEWORK & FOUNDATIONS

- Data Structures, Database Management Systems, Computer Networks, Object-Oriented Programming, and Python programming.
- Hands-on understanding of machine learning workflows including data preparation, model training, testing, and evaluation.
- Practical exposure to MySQL databases, structured records, file handling, and basic software documentation.

PROFESSIONAL TRAITS

- Detail-oriented approach toward UI alignment, clean project presentation, and user-friendly output.
- Quick learner with a strong interest in building deployable projects beyond classroom assignments.
- Collaborative mindset with communication skills in Hindi and English, suitable for academic and team environments.
- Consistent focus on improving coding logic, project structure, and GitHub portfolio quality.
